Sublimation Printing Process

Input digital photos to computer, Edit photos, Print out by sublimation ink-jet printer onto ink-jet paper or heat transfer paper. Transfer the images onto surface of any blanks, by using a proper heat transfer machine.

ThinkSub Imprinting Center

Imprinting Service

ThinkSub Imprinting Center provide all kinds of personalized gifts for customers who want to print your photo in our studio which is fully equipped. We print all blanks available with us including ceramic drinkware, photo plates, phone cases, and other sublimation materials. There is no color limit for your artwork but instead we ensure to give the best color performance and bring all your experience or memories live on our products.

Ceramic Decal

Ceramic decal is the main technique for decorating porcelain, stoneware, majolica and glass of various composition. This technique consists in printing by using ceramic paints on special paper coated with a water-based adhesive. Decal (water sticker) is stuck to the surface and after drying is fired in high temperature – decoration is lasting and inefaceable.

- **Description:**

The all in one mug press has been recognized as one of the most popular heat press machine. The press is designed with 4 additional mug heaters, applicable for 6oz to 22oz mugs and even 12oz and 17oz cone shape latte mugs. With the powerful alternatives, you can imprint different mugs as wanted. Thanks to the device, users can make any specific cone-shaped mug or normal straight mug consecutively, simply by replacing different mug heaters. When the mug heaters need to be changed, loose the screw, take out the old mug heater, replace it with the targeted mug heater, and finally tighten the screw. The machine offers users a choice to print any attractive images onto mugs. With its digital manipulation and humanized design, this new device has been proven to be a perfect machine for printing mugs.

- The above mentioned time & temperature parameters are just for equipment made by our factories. It may be different from others factories;
- The temperature is "Fahrenheit";
- Above listed parameters are only for suggestions from our own experience. You can also try and find out the best from your own operation.

FAQs:

- The color is a bit light: the temperature is too low, or the pressure is unbalanced, or the time is too short;
- The picture is vague: the pressing time is too long causing the ink to spread;
- The cover of the print is not brilliant: the pressure is too heavy;
- The print is partially vague: the heat of pressed area is unbalanced;

- The print has scar: the pressing time is too long;
- The print is in different level color: The pressure is unbalanced or the cover printing materials is not balanced;
- Sticking papers: the temperature is too high or the cover of printing materials is not so good.
